

Container Management Program

Fact Sheet

With more than 13,000 containers in our fleet, Clean Harbors has a variety of types and sizes to meet our customer needs, and provides equipment to service many bulk waste shipment and storage requirements.

The Container Management Program is fully integrated with all other Clean Harbors business lines such as transportation, disposal and onsite container management as part of our InSite Services. Clean Harbors has the industry's most advanced container tracking system, which includes unique bar code labels for every container coupled with hand-held scanning devices.

Open Top Rolloff Containers

- Available in 20-, 25-, 30-, and 40-cubic-yard capacities; other sizes are available upon request.
- Easy to clean.
- The standard door mechanism is a side hinged rear door.
- Tarp tops with bows and tarp tie down mechanisms ensure a safe and compliant covering of the waste being stored and transported.
- Standard transportation equipment can be utilized to transport rolloffs.

Hard Top Rolloff Containers

- Available in 20- and 25-cubic-yard capacities.
- Various lid systems are available.
- Single or double frame trucks can be utilized to transport rolloffs.
- Various liners are available.

Open Top Intermodal Rolloff Containers

- Available in 20-, 25-, 30-, and 40-cubic-yard capacities.
- Ideally suited for rail shipments.
- Bows and a tarp cover the waste material accumulated inside the container.
- Intermodals can be transported with standard rolloff equipment.
- Various liners are available.

Hard Top Intermodal Rolloff Containers

- Available in 20- and 25-cubic-yard capacities and are easy to clean.
- Ideally suited for rail shipments.
- One piece lid system.
- Standard rolloff transportation equipment can be utilized to transport intermodals.
- Various liners are available.

BENEFITS

Clean Harbors' Comprehensive Container Management Program

- Provides full-service container rental, transportation, waste treatment, and disposal options.
- Coordinates all trucks transporting containers through our local service centers and logistics organization.
- Reconfigures containers to support specialty needs.
- Utilizes regional company maintenance facilities.
- Implements a thorough inspection program to track container repair and preventative maintenance needs.

Container Management Program

Fact Sheet

Vacuum Rolloff Containers

- Available in 25-cubic-yard capacity.
- Fully gasketed rear door system provides a means of securement for the storage and transportation of wet solids and sludge materials.
- Extremely versatile and can be transported over the road using most standard rolloff transportation equipment.
- Multiple 8" flange connections provide various options for loading configurations.

Dewatering Rolloff Containers

- Available in 20- and 25-cubic-yard capacities.
- Fully gasketed rear door provides exceptional sealing.
- Dewatering rolloff containers are extremely versatile and can be transported over the road using standard rolloff transportation equipment.
- Liners and tarps can be provided for each container depending on the customer's specific needs.
- Various filtration liners are available: 115, 250, 300, and 400 microns.

Vacuum Dewatering Rolloff Containers

- Available in 25-cubic-yard capacity.
- Various filtration liners are available.
- Fully gasketed rear door provides exceptional sealing.
- Removable screen basket with liner hooks allows a variety of filter options and easy removal for cleaning.
- Multiple 8" flange ports are common on most units.
- Extremely versatile and can be transported over the road using most standard rolloff transportation equipment.
- Center weir filter panel increases surface area of dewatering surfaces and minimizes the duration of holding time.

Frac Tanks

- Available in a 21,000-gallon tank (500 bbl) capacity.
- Most common for on-site storage of water and other non-flammable liquids.
- Multiple valves provide easy access to various pumping configurations.
- Convenient and easy to move or relocate.
- Ideal for phase separation or settling.
- Large volume capacity.
- Easily accessed and easily cleaned.

Lugger Containers

- Available in 7.5-, 10-, 12-, and 14-cubic-yard capacities and are available in Canada only.
- Used for storage and transport of bulk solid wastes.
- Ideal for smaller volume projects or tight spaces.
- Liners and tarps can be provided for each container depending on the customer's specific needs.
- Closed top luggers are also available in some markets.
