

CustomPack® Self-Pack Program

Fact Sheet

CustomPack® Self-Pack Program

Clean Harbors' CustomPack Self-Pack Program offers generators of "lab pack" quantity waste an economical and environmentally sound disposal option. Our network of storage and disposal facilities accepts and processes lab packed chemicals. Disposal capabilities available through our facilities include reclamation, fuel blending, high temperature incineration, aqueous treatment, and secure chemical landfill. The CustomPack Self-Pack Program also provides the following features.

Dedicated Program Managers

Clean Harbors assigns dedicated personnel to provide all approvals, technical assistance, and training on how to properly package waste lab chemicals.

Packing Guidelines

Clean Harbors provides a standard set of packing guidelines as part of this program. If requested, Clean Harbors can develop packing guidelines tailor-made to the waste streams that you normally generate and package.

Transportation

At your request, Clean Harbors will arrange to use our licensed transportation fleet to haul your wastes to our disposal facilities.

Materials

Clean Harbors can provide all necessary DOT rated containers, vermiculite, labels, paperwork, etc. to ensure that our customers' waste is packed safely and in compliance with all applicable regulations.

Paperwork Preparation

Clean Harbors can prepare and provide the necessary paperwork to properly ship waste safely and in compliance with all DOT and EPA regulations.

Clean Harbors Online Services

Clean Harbors offers a state-of-the-art web-based waste management tool designed specifically to help our customers manage their EH&S programs more efficiently. Our customers need only a personal computer with an internet connection to use the application.

The Clean Harbors Online Services application is designed for environmental engineers, chemists, and other waste management professionals who are responsible for the tracking, removal and disposal of waste material.

Benefits of Using Clean Harbors Online Services for Self-Pack Shipments

- **Increased productivity:** Spend your time wisely through accurate accounting of waste inventory. By entering your containers online for shipment, the Self-Pack approval process is streamlined. Emailing or faxing packing lists are no longer required.
- **Improved data integrity:** Managing your waste inventory at the time of creation eliminates the need to manually edit generated paperwork.
- **Better access to information:** Available online. You or any coworker can gain access.
- **Compliance:** DOT shipping names, EPA, and state waste codes, and a database of over 200,000 unique chemical names are available.

Online Services offer several features, including the ability to:

- Create, view, edit or print waste profiles
- Track manifests, including scanned images
- Generate reports, including waste tracking, profile summary and biennial data
- View invoices
- Track waste inventory

The waste inventory module allows customers to create and track containers and drums of any size throughout their facility. Self-pack shipments with Clean Harbors are linked to the waste inventory streamlining the waste approval and order management process. Shipping paperwork is created using the containers selected for shipment.
